

## **Tree Planting Report for the Office of the Deputy President**

In response to the urgent need for environmental conservation and combating climate change, a series of tree planting initiatives were carried out in various locations across the country. These efforts were undertaken under the auspices of the Office of the Deputy President, aiming to enhance green cover, mitigate the effects of deforestation, and contribute to sustainable development.

### **1. Chepalungu: 33,000 Trees Planted**

On May 10, 2024, a significant tree planting event took place in Chepalungu, where a total of 33,000 trees were planted. This initiative, coordinated by local authorities and supported by the Office of the Deputy President, aimed to rejuvenate the forest cover in the area. The diverse range of tree species planted ensures ecological diversity and resilience, furthering the long-term environmental benefits of the project. Community participation was robust, signifying a shared commitment to environmental stewardship and community well-being.

### **2. Kikuyu (Ondiri): 2,375 Trees Planted**

Simultaneously, on the same day, another tree planting endeavor was carried out in Kikuyu, specifically in the Ondiri area. A total of 2,375 trees were planted, enriching the local landscape and contributing to the conservation efforts of the region. This initiative aimed to address the pressing environmental concerns faced by the community, including soil erosion, habitat loss, and climate change impacts. The involvement of local stakeholders, including residents, schools, and civic organizations, underscored the collaborative spirit driving the success of the project.

### **3. St. Augustine Secondary School, Mlolongo - Athi River: 2,200 Trees Planted**

Continuing the momentum of environmental action, on May 24, 2024, a tree planting event was organized at St. Augustine Secondary School in Mlolongo, situated along the banks of the Athi River. A total of 2,200 trees were planted, fostering a culture of environmental responsibility among the younger generation. This initiative not only contributes to the greening of the school compound but also promotes environmental education and awareness among students. The proximity to the Athi River underscores the importance of riparian conservation in preserving freshwater ecosystems and biodiversity.

The tree planting initiatives spearheaded by the Office of the Deputy President reflect a concerted effort to address environmental challenges and promote sustainable development. By engaging communities, schools, and local authorities, these endeavors have not only enhanced green cover but also fostered a sense of environmental stewardship and collective responsibility. Moving forward, sustained efforts will be essential to ensure the long-term success and impact of such initiatives, as we strive towards a greener, more resilient future for generations to come.
